CONTEMPORARY HISTORY.

During this period France had civil war, and war with England, and war with the Pope. Both Louis VII. and Philip II. went on a crusade. Wales, also, had war with England, both in the time of Henry II. and of John. Llewellyn II. finally submitted, and married the daughter of King John. David I. of Scotland espoused the cause of Matilda, and had war with Stephen. Richard I. formed friendship with William I. of Scotland.

CONTEMPORARY HISTORY.

Alexander II. of Scotland married Joan or Jane, daughter of King John of England. This child, as the old chronicler, Matthew Paris, says, had already twice stopped a cruel war. Alexander III. of Scotland also married an English princess. There were occasional wars and constant enmity between England and the Welsh. Louis IX. of France, called Saint Louis, and Henry III. of England, married sisters.

CONTEMPORARY HISTORY.

Margaret, daughter of the king of Norway, granddaughter and heiress of Alexander III. of Scotland, and betrothed to Prince Edward of England, died while yet a child. It was the son of this Edward of England who was first called Prince of Wales, the father having conquered that country. Edward I. of England and Philip III. of France were cousins, their mothers having been sisters.

3. <i>Jane.</i>	

CONTEMPORARY HISTORY.

This Robert Bruce of Scotland was the famous hero of whom so many thrilling adventures are told, both in history and romance. Nor was he the only one in the history of Scotland at that time. The stories of Wallace, Douglas or Randolph are equally interesting. In France an irregular succession was preparing the way for the desolating wars with Edward III. of England. Spain had, up to this time,

had a hard struggle for life. In the eighth century the Moors had conquered almost the whole country, but a small band of patriots had retired to the mountains of Asturias and founded a kingdom; from whence they had won back, almost foot by foot, the land of their forefathers. The little seedling had now grown into three kingdoms, Castile and Leon, Navarre, and Aragon, though the Moslems still held possession of some of the fairest portions of the country.

As our readers will probably remember, there had already been several intermarriages between the royal families of England and Spain. Richard I. won his beloved Eleanor from Castile, while Eleanor of England married Alphonso III.

CONTEMPORARY HISTORY.

The history of France during this whole epoch is told by the chronicler, Froissart, in one sentence: "The king of England lays the kingdom of France under great tribulation." Though, perhaps, after all, France did not in the end suffer more from this war than England herself. The Spaniards, not content with Moorish foes, were warring against each other. In Scotland, also, there were wars over the succession. During this reign lived the first translator of the Bible into English, Wickliffe, and the first great English poet, Chaucer.

CONTEMPORARY HISTORY.

Under the reign of Charles V., called the Wise, the French recover almost all the places previously taken by the English, but his son succeeds to the throne when only twelve years old. There are numerous family quarrels among the nations during this epoch: Navarre with Castile, Brittany with France, etc. Four of Ireland's petty kings have yielded submission to the king of England, though it requires constant warfare to keep them in subjection. A strange thing happened in the church at this time. There were two Popes; this caused a schism in the church which lasted for years. During this period, also, the Turks began to cast longing eyes over into Europe. They were foiled in their first attempts, but at length gained a footing in what is called "Turkey in Europe," from which they have not even yet been entirely dislodged.

CONTEMPORARY HISTORY.

It was James I. of Scotland who was detained so many years as a prisoner in England. France was still rent by factions, and the ambitious young king of England took advantage of these dissensions to revive the claims of the English crown to the throne of France. As one condition of the peace, he married Catherine, daughter of the king of France. Philippa, sister of Henry V. of England, married Eric, king of Sweden and Denmark. The schism which had divided the Latin church for nearly forty years, was finally settled during this reign.

CONTEMPORARY HISTORY.

That which is most memorable in this period of the history of France is the singular career and notable achievements of a peasant girl, Joan of Arc. The kings of Castile were much under the influence of favorites, which got them into trouble, as it always does, but the country was, for the most part, at peace with Aragon and Granada, and, except for a brief war with Portugal, with the rest of the outside world. James I. of Scotland was murdered, and the country thereby plunged into the confusion and discord of a regency. But James II., after a brief struggle for power with the Douglas, established a firm control over his country, and enjoyed comparative tranquility.

CONTEMPORARY HISTORY.

Frederick III. of Germany reigned during a most interesting age, though it did not reflect much credit upon him. The destruction of the Greek empire and the appearance of the victorious crescent upon the Danube failed to call forth the character of hero which was demanded in him. Nevertheless, he left his family's fortunes much more prosperous than at his accession. The marriage of his son, Maximilian, with the heiress of Burgundy, was the beginning

of the aggrandizement of the house of Austria. Either by marriage or conquest, Navarre, Aragon and Castile were about this time united, and turned their combined power against the Moors.

CONTEMPORARY HISTORY.

The period of history for this month, though embracing two reigns, includes only the space of two or three years; too short a time to chronicle many changes among national neighbors. The conflicting statements and widely-diverse opinions found in different historians of the period will furnish sufficient entertainment for the curious. To such we would suggest More, dramatized by Shakespeare, on one side, "Walpole's Historic Doubts," on the other. Gardiner is full, and apparently impartial, and Knight gives a good summary of the argument for and against.

CONTEMPORARY HISTORY.

James IV. of Scotland, by his marriage with the daughter of Henry VII. of England, prepared the way for the permanent union of the two kingdoms under James VI. of Scotland, I.

of England. The son and daughter of Frederick III. of Germany married a princess and prince of Spain, thus throwing the weight of these two great powers into one scale, and unsettling the balance of Europe for the greater part of a century. The hand of the heiress of Brittany created quite a stir among the princes, which ended in her marrying two successive kings, Charles VIII. and Louis XII., of France.

By the marriage of Ferdinand and Isabella, Castile and Aragon were united. Their daughter, Catherine, was first wife to Henry VIII. of England. It was during this period, and under the special protection of Ferdinand and Isabella, that Columbus discovered America.

CONTEMPORARY HISTORY.

The history of the wars in Italy was virtually the history of continental Europe for the greater part of the reign of Henry VIII., France, Spain and the Pope contending for the right to rule over the different Italian States. Pope Julius II. was ambitious to expel all foreign armies from the country and render Italy free, save for the supreme sway of the See of Rome, but death overtook him before he had fully attained his object, and however strongly his successor might have desired to follow out his policy, his pontificate stands, upon the record of history, chiefly remarkable for the rise of the great Reformation. The brilliant figures of Charles V. of Spain and Germany, and Francis I. of France, made illustrious the latter part of this period. The sovereigns of Scotland also became entangled to their hurt by yielding to the influence of France against their neighbors, relatives and natural friends, the English.

CONTEMPORARY HISTORY.

Charles V. was wise, politic and popular, and managed to hold the power over his immense domains (Spain and the Empire) as few others could have done, but found himself utterly unable to force his Protestant subjects to "return to the bosom of the church." The king of France, Henry II., was inferior to his predecessor, but there were many noted characters in France at this time, the Duke of Guise, Marshal de Vieilleville, Gaspard de Coligny, etc.

CONTEMPORARY HISTORY.

Ferdinand I., the brother of Charles V., fell heir to his German dominions. Philip II., his son, became king of Spain. It was this Philip II. who married Mary, queen of England, and who made such a determined, uncompromising effort to bring the Netherlanders back into the Romish church. Under him, the Duke of Alba won an unenviable notoriety for cruelty and bigotry, and against him William of Orange won a high place in history for indomitable courage, energy and perseverance. During this period Calais, which had been in possession of the English since the time of Edward III., was recovered by the French.

CONTEMPORARY HISTORY.

Catherine de Medicis, wife of Henry II., held almost undisputed sway through the reigns of her three sons, and she is supposed to have been one of the prime movers in the terrible massacre of St. Bartholomew, which cast such a horror over all Europe. Philip II. was more successful in his struggle against Protestantism in Spain than he was in the Netherlands.

Both Ferdinand I. and his son, Maximilian, seem to have learned the lesson of moderation so little known elsewhere in Europe. The difference of religious opinion between the Scottish sovereigns and their subjects was a source of great trouble, as it always is.

CONTEMPORARY HISTORY.

It was Henry IV. who granted the Edict of Nantes, the great bulwark of French Protestantism. The weak Emperor of Germany, Rudolph or Rudolphus, allowed a great deal of his empire to slip away from him. Ferdinand, who became his successor as king of Bohemia, was entirely unacceptable to his subjects, and an at-

tempt was made to place Frederick V. on the throne instead, but the latter had not the necessary strength and energy to hold his position. When the conflict came, Ferdinand triumphed, and Frederick fled a refugee to Holland. This was one small corner of a desolating war, which raged from Bohemia to the mouth of the Scheldt, from the Po to the Baltic, known in history as the "Thirty Years' War." One of the most brilliant heroes of this war was Gustavus Adolphus of Sweden.

CONTEMPORARY HISTORY.

The man who molded, for the most part, the history of France, and shared the responsibility of almost every political event of Europe during this period was Cardinal Richelieu, Minister of State. The result of his administration in France was the establishment of the absolute authority of the sovereign. It was during this period that the "Pilgrims" landed on the coast of Massachusetts, and found a home there. Ireland, once the home of letters, arts, science and biblical study, had, even in the time of Henry II., sunk to a condition of barbarism and superstition. Nearly all of the English kings, from that time on, that were at all aggressive, had attempted the civilization of Ireland, but either they had tried the wrong way, or the Irish were incorrigible, for each effort seemed to leave the islanders worse than before. The would-be benefactors succeeded only in inspiring them with hatred and distrust of the English.

CONTEMPORARY HISTORY.

Spain had reached the zenith of her greatness in the reign of Ferdinand and Isabella, and had been gradually declining ever since in agriculture, commerce and mechanical arts. The Portuguese, who had been for awhile under the rule of Spain, took advantage of the succession of weak princes to claim their independence. Germany was still in a state of depression from the thirty years' war, and had, moreover, to contend with the unscrupulous ambition of its young French neighbor, Louis XIV. Nevertheless, Ferdinand ruled with wisdom and moderation, and Germany was at peace. Leopold, his son and successor, was mild and inactive; so the country suffered. Cromwell laid a heavy hand upon poor Ireland; but, when his work was done, the island was at his feet for the time. The war of the Fronde commenced in France in the early part of the reign of Louis XIV.

CONTEMPORARY HISTORY.

By this time Louis XIV. had begun in earnest to show his claws. His first campaign alarmed Europe, and England, Holland and Sweden formed the "triple alliance" against him, but Louis managed to have influential friends in each country, controlled by his money. William of Orange, the young Stadtholder, was his most determined and powerful opponent.

The German princes, with a few noble exceptions, looked on with indifference at the aggressive movements of Louis, but were aroused to action at last by a revolt of the Hungarians and a fresh invasion of the Turks. The affairs of Spain grew worse and worse; civil dissensions were added to general decay. Portugal, after gaining its independence, seemed, for awhile, to promise better things; but, like Spain, had to contend against the disadvantage of weak and wicked kings.

CONTEMPORARY HISTORY.

Louis XIV. still ruled in France, and, thanks to his able advisers and full coffers, to a considerable extent in all Europe. Leopold I. was still emperor in Germany also, but a spirit of royal aspirations was abroad among his princes. The house of Hanover was raised to the electoral dignity, and, in the next generation, placed a king upon the English throne. On the death of the gallant John Sobieski, Frederick Augustus, prince of Saxony, was elected king of the Poles, and Frederick, elector of Brandenburg, and Duke of Prussia, assumed the title, no man hindering, of king of Prussia.

SWEDEN. Charles XII.	

The death of Charles II. of Spain proved a matter of the greatest moment to all Europe, because his successor was to be chosen either from the house of Bourbon or the house of Austria, and this seriously involved the balance of power in Europe. The two principal claimants were Philip, Duke of Anjou, grandson of Louis XIV. of France, and Charles, second son of Leopold, Emperor of Austria. The war ended, leaving Philip upon the throne, but under a solemn covenant to renounce for himself and heirs all claim to the throne of France. While all Southern Europe was thus contending over the throne of Spain, the Swedish king was creating some commotion among the Northern powers. Because he was only a boy of fifteen, his neighbors thought it a good time to settle all reasonable or unreasonable claims upon his dominions, however long or justly disputed. But they found Charles XII. better able to defend himself than they supposed, though he did succumb at last to overpowering numbers.

The death of Louis XIV. left the throne of France to his great-grandson, Louis XV., a child of six years. The crown in the hands of a child excited the cupidity of Philip, notwithstanding his renunciation of all claim, and though there were marriages, and an outwardly friendly intercourse, there was real enmity and jealousy. Meanwhile Russia, under the vigorous efforts of Peter the Great, and his wife, Catherine I., was pushing its way to the ranks of civilized nations.

The principal matter of interest in Europe during this period was the contest between the two young sovereigns, Frederick the Great, King of Prussia, and Maria Theresa, the youthful Empress of Austria, and many are the pages, both of history and romance, which have been filled with the thrilling events thereof. Russia had various changes in government. Philip V. of Spain died, and was succeeded by two of his sons in succession.

Bonaparte, after a brief and brilliant career of ambition, and having by force of arms compelled almost every government on continental Europe to yield to his power, was himself in turn obliged to succumb to the combination of all Europe against him under the leadership of England. On his abdication a brother of the murdered Louis XVI. was restored to the throne, under title of Louis XVIII. Spain suffered greatly from the despotic ambition of Bonaparte, who placed his own brother on the throne. And John VI. of Portugal took refuge with his family in their American colony of Brazil. Meanwhile, Austria, Russia and Prussia had formed between them "the Holy Alliance," for mutual defense and protection.

The ambition of Bonaparte had unsettled nearly every government in Europe, and a wave of revolutionary spirit followed soon after. Spain and Portugal were rent with contending factions. France grew once more disgusted with the Bourbon family, and by a sudden turn of the social wheel placed Louis Philippe on the throne. Belgium and Holland fought themselves free from a union into which they had been forced by the autocratic powers of Europe. Russia's Polish provinces were in arms, and there was much excitement in the German States. Even in the United States Gen. Andrew Jackson did

not find his eight years' administration all smooth sailing. There was some trouble with the Indians, and a right serious crisis with South Carolina, besides the bank troubles.

In this period again we have in France another of her characteristic *coups d'etat*, which places Napoleon III. in power and sends Louis Philippe into exile. Then there is the famous Crimean War, begun by Russia against the Turks, but into which France and England are both drawn to face the Russian aggressor and prevent, for the time, his further aggrandizement and the Hungarians' brave struggle for independence; the war in Italy, which ended with Victor Emanuel proclaimed king, and considerable insurrectionary agitation in Germany. The United States also have a war with Mexico, and a good deal of trouble over the new States being formed.

The war of the Confederacy was the next matter of interest. Four years of bloody warfare between the Northern and Southern States, and the questions of slavery and States' rights permanently settled. Victor Emmanuel, having succeeded in founding a united kingdom of Italy, dies and leaves his son upon the throne. Spain, having banished her queen for misconduct, and given unintentional grounds for the Franco-Prussian War, accepts as king the son of her exiled queen, and settles down into uneventful existence. Prussia, Emperor William and Bismarck seem to receive fresh aggrandizement from every turn of fortune's wheel, especially from the Franco-Prussian War, which leaves poor Louis Napoleon a captive, soon to die. France is at last a republic. Has she learned sufficient moderation to accept liberty without claiming license?

NOTE.—We have tried to select, as far as possible, such books as can be easily obtained, even among those published in cheap editions; though one or two may have crept in of those which are more rare.
